EXPLAINING THE STUDENT WALL PLANNER

WHY USE A STUDENT WALL PLANNER?

Successful students are students who are typically well organised and manage their time in a very effective manner. Successful students give their study a high priority and organise themselves so that they can keep all their activities in a steady balance.

Question: What are the major problems encountered by most secondary school students before they become successful?

Answer: Developing time management skills and sound study organisation.

The Student Wall Planner provides a valuable organisational base so you can achieve the results of which you are truly capable.

Because the life of a high-school student is a busy one, the Student Wall Planner has been developed by experienced teachers to give students a useful tool to develop their time management skills and plan their study to achieve rewarding results.

Many parents and teachers experience the frustration of helping children organise their time in a mature manner to enable them to keep study, leisure and other activities in balance. Teachers 'know' students achieve better results if they are more organised with their time and give study the appropriate priority. Learning good time management is also an essential skill to develop beyond secondary and into tertiary studies or working life.

The Student Wall Planner is set out in such a way that the student develops an overall picture of the way they spend their time with study. The Student Wall Planner also encourages the student to set goals and record the amount of time

that they devote to genuine study on their subjects.

Because the Student Planner is best displayed on the wall at home, it gives parents the opportunity to assist their child develop organisation skills. There is no doubt that a school diary serves a very practical purpose but many students seem unable to maintain a diary as a standard that keeps it useful for an entire year without parents constantly checking the diary (and, let's face it, how many parents check the diary of their 15, 16, 17 year old child?). The Student Wall Planner is a more convenient means to check and it allows parents to offer their child advice for ways to improve their time management.

Another important feature of the planner is that it is **Laminated**. This allows the Student Wall Planner to be written on with a non-permanent felt marker like the 'over-head' projector pen. All information written on the Student Wall Planner can be wiped clean and changed as desired. The Student Wall Planner can be re-used continuously throughout high school.

The study of school work is a very important activity of which students are constantly reminded. The key to successful study is good organisation beforehand. The various features of the Student Wall Planner are hereby explained and some advice on how students can increase their time management skills and improve their study habits is also offered.

1 SCHOOL TIMETABLE

This is where you write in your school timetable for easy access at home. If you do not have classes for all the spaces provided, you can use the remaining spaces for extra activities such as sport training, drama club, choir, science club etc.

2 DAILY HOMEWORK AND STUDY TIMETABLE

A Daily Homework and Study Timetable is a vital organisational tool for any student who is serious about achieving good results with their school work. Study left until the night before the examination nearly always results in a performance well below your true capabilities mainly because of the increased pressure that you bring upon yourself. A good Daily Homework and Study Timetable displays a balance between the various school subjects you undertake as well as other activities likely to be encountered during any term. A well planned timetable also shows a regular routine where possible so that your mind and body come to expect a certain type of pattern. The amount of time spent on homework and study will vary depending on your age. You can enter your own time schedule into the left hand column. It is best to ask your teachers to explain what they believe is a fair amount of time for you to allocate to homework and study each week and for each subject you take consider your age and ability.

BALANCE HOMEWORK, STUDY AND LEISURE. It is important to set aside leisure time, time for assignment work, homework, study and time for reading. No doubt that you will want time to watch TV or play your favourite computer games, but these are only some activities among so many that you have to keep in balance.
